#### Shotgun is Clue.

The Jackson residence was robbed on September 9 of last year, during the absence of the family. Silver ware, clothing and furs were taken, but in the loot likewise was a Purds shotgun which had been presented b a British nobleman to Tod Sloan. the jockey, and in turn had been given by Sloan to Jackson some years ago.

Weeks and mouths passed without legation or recovery of any of the stolen goods. Then Mrs. Jackson decided to take a hand in the search. Unlisting her sister in the detective work, Mrs. Jackson made the rounds, one by one, of pawnshops and second-hand stores in San Fran cisco and the bay region. She felt sure she would find the shotgun. And the did. The two women found it at a second hand store. The proprieor consulting his books, found he had jurchased it from Axelrod. Mis-Jockson then notified the police, Loot Is Discovered,

Detective Sergeants Tatham on i Gregson went to the Axelrod house and watched the premises, but failed to note enviling suspicious. This did not satisfy Mrs Jackson, who obtained a search warrant, specifying a set of carried ivory elophants winch had been among the articles stolen from her home. ### **NEW FORDS ON** DISPLAY HERE

Many Improvements Over Tremendous Production Is The Older Models

The first, of the new type Ford cars wich recently arrived in this city are now on display at the show room of Linn Motor company, local Ford

The higher radiator, now standard in all Ford types, has brought a general improvement throughout the entire line and a new radiator apron blending with similar apron effects on the fenders gives the front of the ear a highly finished appearance.

The touring car shows a decided improvement having a more strenmline effect. It is lower in appearance, a feature adding much to the attractiveness of the slanting windshield and n←man top.

The Ford runabout is likewise much

improved and looks more sturdy. The coupe is entirely new in body design and construction. There is a comfortable senting arrangement and greater luggage carrying capacity. From the dash there is a graceful sweep in the cowl to the radiator. The larger compartment at the rear gives increased room for luggage and the new type rear fender is more secure. Ventilator in the cowl and a visor over the windshield add to the exterior appearance, effecting a high quality aspect.

"Interior arrangement is most convenient and the uphold-tery is choice. # SLICE PRICES

Ascribed as Cause

Wow! Like the proverbial "bolt from the blue" came the announcement of the drop in Chevrolet prices. It is doubtful if any event in autonobile history ever created a furore to equal the one caused by this decision on the part of the Chevrolet manufacturers. It had been believed all along that the Chevrolet was already down to rock bottom. It did not seem conceivable that a car as good as the sturdy Chevrolet penny less than was asked for it. Dealers believed that. The public conceded it. And the demand cantinued to pour in at a rate which conclusively that the public was perfectly satisfied with the price asked

And then came the announcement of a still further reduction. "And more trim exterior appearance, more I'll tell the world it took us all by surprise," said Philip Inman. local dealer. "How to account for it? Well, there is only one answer to that—tremendons production. And doors are wide and heavy framed. Huge Orders Follow New 1924 Model

FLINT, Mick, Sept. S,-o'The influx of orders is keeping us all on

The situation at the big Buick plant, where nearly 20,000 men are doing their bit to help supply the demand for cars, was thus terrely deeribed today by E. T. Strong, general sales manager.

"To reach maximum production of new models is a gradual process," Mr. Strong said, "but we are happy o report that there has developed to serious obstacle to its attainment within a normal period. Production is growing every day and it looks like snother record year for us."

This official pronouncement from Buick is verified by the feeting of confidence that permeates the atmosphere of this bustling little city to which the condition of the nutomobile trade means much. The new Buick cars are regarded here as so great an advance in automotive engineering and body design that only a material decline in general prosperity can curb the demand for them

### Fashion Says Satins for Frocks-'And They're Here!

Perhaps because the 1880 influence dominates semiformal Frocks this Fall, satin has been selected by leading designers to make many of them. Satin-faced Canton and Frost Crepe are two new fabrics too. They exactly suit these picturesque modes. Pleats in wide flounces from knee to hem-line are a leading note. Godets in back, that give a new flat back, are smart, too. You will find these and many other smart ideas in new Satin Frocks assembled here now and reasonably priced.

ATE VI. HE GULF REFINING CO. to MEWS has waited for sometime for detailed information regarding the Would against the Gulf Refining Co. The M sompany is accused of unfair practices in the matter of selling genoline at its filling dilions throughout the state. The gist of the state's complaint seems to be that the Gulf mpany outfitted filling stations with the mary paraphenalia to dispense gasoline and then exacted a promise from these stations that the price would be dictated by the Gulf company.

We are not familiar with this angle of the esse and without taking up the cudgle for the Gulf company editorially we do believe it no more than right that this paper should call attention to some facts regarding this corpora-

The Gulf company is incorporated for many millions of dollars. It is probably the greatest of the independent petrofeum companies now doing business outside the Standard Oil group In the past ten years it has developed from a small refinery of a few barrels capacity to the greatest refining company in the entire world claiming a capacity now of more than 100,000 barrels, per day In order to do this it naturally increased many fold the size of its plant and has as a matter of fact spread out from a few acres to several thousand. The growth of the plant has been one of the marvels of the petroleum world and The NEWS believes it is one of the greatest single assets there is to the state of Texas. "THE prospects are good and I am pleased with the success we're having. Coach Leo Smith smiled through the perspiration that trickled down his face while he talked. He was talking about fight at Toledo, and from then on I O'Hara. Fort Dodge, lown, heat his 1923-24 football machine, and the aforementioned "ma-
